DETAILED ACTION

1. As indicated in the interview summary of 14 October 2005 with Mr. Kirk, there are two different inventions claimed and one invention should be elected and the other claims filed as a Divisional application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 and 26-44, drawn to a method for coordinating travel itineraries by providing an indication regarding a relative weight between price and schedule and labeling the identified itineraries,
- II. Claims 20-25 and 45-50, drawn to determining at least one of: (i) the amount of time between the arrival times for the at least one outbound itinerary associated with any two travelers; and (ii) the amount of time between the departing times for the at least one inbound itinerary associated with any two travelers; and identifying at least one of: (i) at least one suggested outbound itinerary for each traveler having based upon the amount of time between the arrival times of the respective traveler and at least one other traveler, and (ii) at least one suggested inbound itinerary for each traveler based upon the amount of time between the departing times of the respective traveler and at least one other traveler.

The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr Kirk on 14 October 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
